Re: 2023 TPO Project Priority List

Issue: The North Florida Transportation Planning Organization (TPO) is requesting Clay County submit its project priority list for 2023.

Project Priority List: Each year the North Florida TPO requests that each County and municipality submit an updated list of priority projects. The list of priority projects identifies potential projects to be funded in the new fifth year of the FDOT Work Program. However, by creating the Strategic Intermodal System (SIS) and the Transportation Regional Incentive Program (TRIP) in Florida, the *"List of Priority Projects"* now includes potential projects to be funded in other years of the FDOT Work Program under the SIS and TRIP programs."

Requests from municipalities are submitted to the TPO separately. However, the TPO has requested that any project requests from municipalities be included with the County's list. Each of the municipalities' projects are included in this list but should be evaluated by the TPO on their own merits.

SUN Trail Projects: The Shared-Use Nonmotorized (SUN) Trail program provides funding to help communities develop the statewide system of high-priority (strategic) paved trail corridors for bicyclists and pedestrians. This SUN Trail network, which includes a combination of existing, planned and conceptual multiple-use trails, is a refined version of the Florida Greenways and Trails System (FGTS) Plan's Land Trails Priority Network. The FGTS defines the role of the statewide trail system in advancing Florida's economy, tourism, health, transportation choices, recreation, conservation and quality of life. Implementing projects in the SUN Trail network increases the reliability of Florida's transportation system.

Transportation Alternative Program Projects: The Transportation Alternatives Program (TAP) provides funding for programs and projects consistent with details described under 23 U.S.C. 133(h)(3), including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail program projects and safe routes to school projects.

Congestion Management and Air Quality (CMAQ) Projects. The CMAQ program encourages transportation projects that improve air quality. It includes efforts to enhance public transit, bicycle/pedestrian facilities, ridesharing programs and facilities, and technologies that improve traffic flow and vehicle emissions.

County staff recommends the following projects be recommended for funding. Project Priority 2 is the multi-purpose trail to connect to the Duval County trail system and eventually provide a full connection to the Palatka-Lake Butler trail and has been divided into subphases consistent with the Comprehensive Plan. The County requests that the entirety of this trail be added to the list of Sun Trail projects. The other requested projects are possible CMAQ and TAP projects.
